- Settings 1 -

As well as getting the characters right, with clear heroes and villains with their own 'wants', it is important to get your settings right too. Think of all the wonderful settings in Charlie and the Chocolate Factory—in many ways, the factory becomes like another character, full of life and possibility. The same goes for Harry Potter—Hogwarts, Diagon Alley and the Dursleys' house are all very distinctive.

Draw your own unique setting!

Look for the letter that your name begins with (you can choose your first, middle or surname) and draw the sky you have been given!
